DESIGN

UNPRECEDENTED STYLE

Contemporary & Classic

Our stunning collection of veneers are suitable for tiling over various internal and external surfaces. Both contemporary & classic designs coupled with superior craftsmanship come together to create the perfect solution for your stone walling with less impact on the environment.

ENDURING QUALITY

Perfected by nature

The harsh Australian climate only enhances the natural beauty of Veneer Stone. Unsealed, our stone simply gets better with age bringing the European look from years of weathering. To retain the fresh quarried look and enhance the natural colours seal the stone with a penetrating silicon based sealer.

TIMELESS DESIGN

Designed in Australia for Australia

With a wide spectrum of natural colours and textures to choose from our stone tiles have been designed based on Australian styles and traditional colours from SA Limestone to the Central Coast Sandstone and Victorian Bluestone.
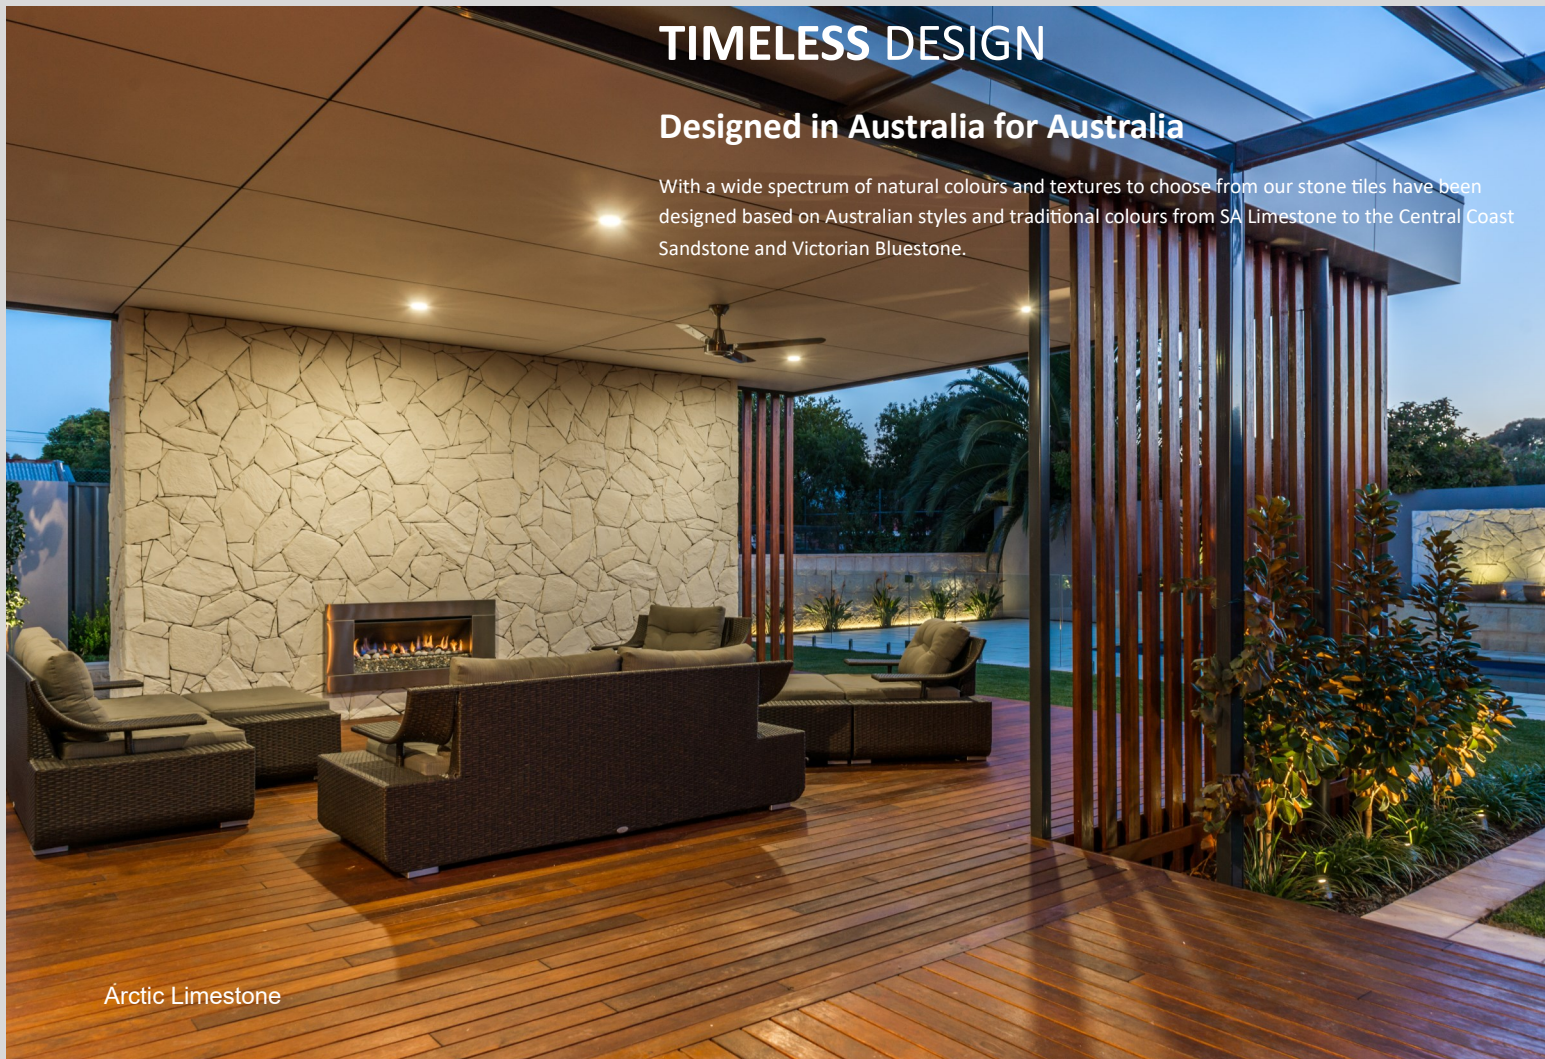

Arctic Limestone

Engineered by man

We carefully blend crushed sandstone with less than 1% natural colour pigments to create the distinctive look and relaxed feel of solid natural stone walling with a fraction of the weight. All products come in tile form and range from 20-43mm in thickness. Pre-fabricated corners and capping are available for all products and are highly recommended for use

Estimating Stone Required

When installing with dry joints (dry stacked) add an extra 10-15% to allow for extra cuts and wastage.

BODIES: Calculate the total surface area by square metre

Multiply length x height of wall area   then   deduct any openings like doors and window
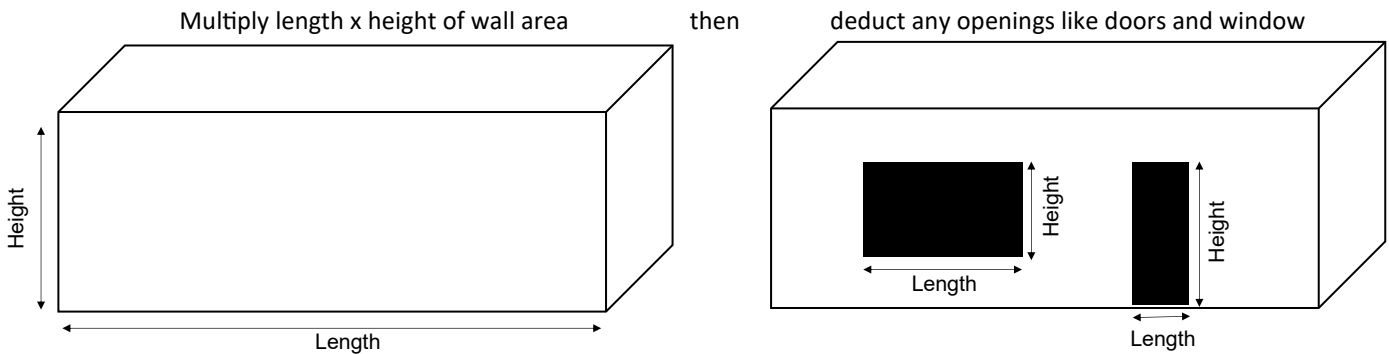

CORNERS: Calculate the lineal metres of corner stones required by measuring all external corners from top to bottom. (please note 1 lineal metre of corners equates to approximately 0.2m2 of bodies)

Length of corners required
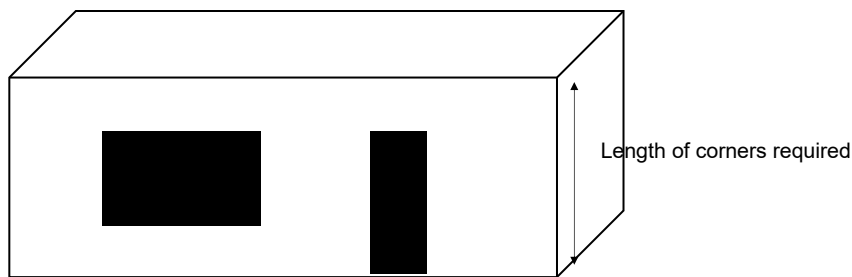

RANDOM SHADE VARIATION

Extreme colour and texture variation will occur from piece to piece and within each batch for a random look. The look of the final installation will be unique. Please review the range of products before making your final selection.

APPLICATION

Suitable for interior and exterior walls, Veneer Stone can be installed around fireplaces, though no closer than 25cm to a naked flame. Veneer Stone can also be installed around wet areas, however, continued exposure to chlorine and other chemicals may eventually affect the colouration of the products. When frequently exposed to water, we recommend protection with Ven Seal Ultra WB sealer.

WEIGHT - all weights are approximate

	Bodies	Corners
Arctic Range	48-55kg m2	13kg L/M
