# CHOOSE YOUR COLOUR

The product colours in this booklet are as accurate as current photography & printing techniques allow. We suggest you look at actual samples for a better idea and selection.

# LEDGESTONE

Ledgestone offers the look of dry stacked stone which gives timeless beauty to any application, whether it's your house facade, office feature wall, fireplace, poolside feature or general landscaping. Ledgestone's interlocking panel allows for user friendly installation with the most complex of designs.

# LEDGESTONE INSTALLATION

**Important Note:** Our Ledgestone collection has been designed to have irregular edges to give a rustic appeal. This will create small voids between some panels. If your application requires corners to be covered, apply these first. We suggest you prepare the wall by ensuring the colour of the wall is similar to the stone. This can be done by tinting the glue or mortar with an oxide. Check with your local glue supplier for warranty & terms.

- Ledgestone has been designed for dry stack installation/presentation. When applying the panels keep the joints as tight as possible to retain the natural dry stone look.
- If your application requires corners to be covered, apply these first
- After the corner pieces have been applied, apply the stone panel's 1-2 layers at a time, working towards the centre.
- Colour, size and texture variation is an essential aspect of a natural looking stone wall. Select stone from different boxes and lay out across your job site to ensure you gain this look. The visual effect will be enhanced by an overall natural mixed presentation

Sample Installation guide – (just like brick work) avoid straight vertical lines when placing the stone

All bodies interlock around corners

**Cutting the stone panels:** The stone panels can be cut or trimmed using a wet saw, hammer & bolster, wide mouth nippers or angle grinder with diamond blade attached.

**Sealing:** To retain the original fresh quarried look we suggest sealing the stone. If you would like the stone to mellow slightly and gain the European look after years of harsh weathering don't seal the product.

# DESIGN

## UNPRECEDENTED STYLE

### Contemporary & Classic

Our stunning collection of veneers are suitable for tiling over various internal and external surfaces. Both contemporary & classic designs coupled with superior craftsmanship come together to create the perfect solution for your stone walling with less impact on the environment.

## ENDURING QUALITY

### Perfected by nature

The harsh Australian climate only enhances the natural beauty of Veneer Stone. Unsealed, our stone simply gets better with age bringing the European look from years of weathering. To retain the fresh quarried look and enhance the natural colours seal the stone with a penetrating silicon based sealer.

Ledgestone Travertine

## ENGINEERED BY MAN

We carefully blend crushed sandstone with less than 1% natural colour pigments to create the distinctive look and relaxed feel of solid natural stone walling with a fraction of the weight. All products come in tile form and range from 20-43mm in thickness. Pre-fabricated corners and capping are available for all products and are highly recommended for use.

# ESTIMATING STONE REQUIRED

When calculating quantity required please add an extra 10% to allow for extra cuts and wastage.

## BODIES: Calculate the total surface area by square metre

**CORNERS: are not required with this collection due to the interlocking nature of the 'Z' shaped panels which interlock around corners making this collection one of the most cost effective products on the market.**

## RANDOM SHADE VARIATION

Extreme colour and texture variation will occur from piece to piece and within each batch for a random look. The look of the final installation will be unique. Please review the range of products before making your final selection.

## APPLICATION

Suitable for interior and exterior walls, Veneer Stone can be installed around fireplaces, no closer than 250mm to a naked flame. Veneer Stone can also be installed around wet areas, however, continued exposure to chlorine and other chemicals may eventually affect the colouration of the products. When frequently exposed to water, we recommend protection with Ven Seal Ultra WB sealer.

WEIGHT - all weights are approximate

Approximate Weight per m<sup>2</sup>

### Bodies

Ledgestone Range 44kg
